

TRUST

Our Promise

Trust isn't something you ask for.

It's something you earn.

Venue owners trust you with life's most meaningful celebrations.

You trust us with your business.

We take that responsibility seriously.

SECURITY

Trust is earned.

Venue owners trust you with some of life's most important celebrations.

You trust us with your business.

We take that responsibility seriously.

Encryption

Your data is protected in transit and at rest using industry-standard encryption. Sensitive information never travels in the clear.

Secure infrastructure

Hello to Cheers runs on carefully chosen cloud infrastructure with modern security practices—isolation, hardening, and least-privilege access as a default.

Backups

We maintain regular backups so that unexpected events don't mean lost celebrations, lost conversations, or lost history.

Access controls

Team permissions and account access are designed so the right people see the right information—and nothing more.

Monitoring

We watch for unusual activity and system health continuously, so we can respond quickly when something needs attention.

Payments

Payment card data is handled by Stripe—a PCI-compliant payment processor. Hello to Cheers is not designed to store raw card numbers on our systems.

Ongoing improvement

Security isn't a one-time checklist. We keep improving our practices as threats and technology evolve.

PRIVACY

In Plain English

We don't sell your data.

We use it only to operate and improve Hello to Cheers.

We'll always be transparent about how your information is used.

Read the full Privacy Policy →

DATA OWNERSHIP

Your data belongs to you.

Not us. Not ever.

If you choose to leave Hello to Cheers, your data should leave with you.

You can export your information before cancellation—without filing a support ticket or navigating unnecessary barriers.

That philosophy isn't a footnote. It shapes how we design the product.

RELIABILITY

Prepared for the work of real venues.

Automatic backups

We back up your workspace so celebration records, planning history, and conversations have a safety net.

High availability

We design for steady uptime and resilient infrastructure, recognizing that venues rely on Hello to Cheers during real events—not only quiet mornings.

Planned maintenance

When maintenance is needed, we aim to communicate clearly and schedule thoughtfully whenever possible.

Incident communication

If something goes wrong, we believe you deserve honesty, clarity, and updates—not silence.

System Status

Our System Status page is where we'll share current operational status and notable incidents as Hello to Cheers grows.

Continual improvement

Reliability is a practice. We keep investing in the quiet work that keeps hospitality software feeling calm.

We work hard to keep Hello to Cheers available and healthy. Like all software, we cannot guarantee uninterrupted service at every moment—and we won't pretend otherwise.

View System Status →

COMPLIANCE

Honest about where we are—and where we're going.

We take compliance seriously, and we prefer clarity over buzzwords.

Payment security: card payments are processed by Stripe, which maintains PCI DSS compliance for cardholder data.

Accessibility: we design Hello to Cheers with inclusive usability in mind and continue improving accessibility across the experience.

SOC 2: we are building our security and operational practices with a SOC 2 roadmap in mind. We will only claim a SOC 2 report when one has been completed—not before.

As additional compliance initiatives come into place, we'll update this page with the same honesty we expect from hospitality itself.

TERMS

In Plain English

We built Hello to Cheers to earn your business every month—not lock you into it.

Here's what that means.

You can cancel your subscription anytime.

You own your data.

We'll protect your information.

We'll be transparent if something goes wrong.

We'll never intentionally make leaving difficult.

Read the full Terms of Service →

SUBSCRIPTION PHILOSOPHY

Simple Pricing. Simple Terms. No Surprises.

We don't believe software should keep customers through contracts.

We believe it should earn the privilege to serve them every month.

Our subscriptions are month-to-month.

No long-term contracts.

No cancellation fees.

No hidden pricing.

No unnecessary friction.

If you're happy, we hope you'll stay.

If we're no longer the right fit, we'll make leaving just as respectful as joining.

Cancel Anytime

No contracts.

No cancellation fees.

No phone calls.

No emails asking you to stay.

If Hello to Cheers is no longer the right fit, you can cancel your subscription in just a few clicks.

We'll be grateful for the time we spent working together.

30-Day Happiness Promise

If Hello to Cheers isn't the right fit during your first 30 days, we'll happily refund your first month's subscription.

After that, your subscription continues month-to-month until you cancel.

No hassle.

No surprises.

We believe great software keeps customers because they love using it—not because they're locked into a contract.

We know trust isn't something you can ask for. It's earned. It's something you earn.
