

CONNECTED JOURNEY · 09

Floor & Seating Plans

Every space prepared with confidence.

Floor plans, seating layouts, inventory, and guest counts stay connected to the same booking—so the room you're preparing is always the room you're expecting.

01

One Living Layout

Floor plans stay connected to the booking instead of becoming separate documents.

02

Built Around Reality

Guest counts, inventory, and room layouts evolve together as plans change.

03

Ready Before Setup

When setup begins, your team already knows exactly what belongs where.

The room shouldn't surprise you.

Changes happen.

Guest counts grow.

Tables move.

Packages evolve.

Hello to Cheers helps ensure the room reflects those changes before setup begins—not after.

Room Prepared

Setup Begins

Celebration Ready

Every placement has context.

Your floor plan isn't just a drawing.

It's connected to the people, inventory, and celebration it was created for.

“Beautiful celebrations begin with thoughtful preparation.”

When the room is ready, your team is free to focus on the people walking through the doors.

Confidence before setup begins.

Every room changes as planning evolves.

The difference is knowing those changes before anyone starts moving tables.

Because Hello to Cheers keeps your floor plans connected to the event—not disconnected from it—your team can prepare with confidence instead of discovering surprises during setup.
